### Job Description

#### Company Overview:

A well-established manufacturing company specializing in high-quality pharmaceutical products is seeking a dedicated and hands-on Equipment and Process Engineer to join its growing team. The company is committed to continuous improvement, operational excellence, and delivering top-tier solutions to global customers.

#### Job Responsibilities:

- Troubleshoot machine issues to ensure smooth and continuous production operations.
- Improve existing production processes while minimizing operational costs.
- Ensure preventive maintenance activities are well-planned and effectively executed.
- Conduct in-process checks to maintain product consistency and quality.

- Calculate production costs, identify cost-reduction opportunities, and reduce reject rates.
- Determine production lead times and implement improvement strategies for efficiency.
- Understand, analyze, and optimize machine test parameters to ensure accurate testing and stable production performance.

Key Requirements:

- Proven hands-on experience in a production or process engineering role.
- Strong analytical skills with the ability to calculate and manage production costs and lead time.
- Ability to communicate effectively in Mandarin to liaise with machine suppliers from China and maintenance teams.
- Solid understanding of preventive maintenance, machinery operations, and troubleshooting methods.
- Able to train and guide machine operators on correct processes and best practices.
- Proactive, detail-oriented, and capable of driving process improvements with minimal supervision.
