Job Description

This role is a Data Engineer position responsible for building and maintaining DOMO reports by processing Couchbase data into RDB, reviewing queries, debugging issues, and supporting releases. The position offers long-term work with potential for future full-time conversion in a bilingual, data-driven environment.

Client Details

This position is with a large organization in the IT industry. The company is known for its innovative approach to technology and its commitment to excellence in delivering cutting-edge solutions

Description

- Build and maintain reports by transforming large-scale data into RDB structures and developing ETL workflows based on user requirements.
- Review SQL queries for accuracy, efficiency, and alignment with system specifications.
- Investigate and resolve data or report issues through debugging, testing, and root-cause analysis.
- Support system testing, release activities, and continuous improvements within the reporting environment.

Job Offer

- Opportunity to work in a large organization within the IT industry.
- Chance to work on cutting-edge data engineering projects.
- Expand your expertise in data systems and infrastructure.

If you are ready to take the next step in your career as a Data Engineer, we encourage you to apply today!

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

A successful Data Engineer should have:

- Strong experience with relational databases and SQL (7+ years), plus hands-on Python skills for building, debugging, and maintaining data workflows.
- Ability to create and optimize ETL pipelines and reports, ideally with DOMO and experience working with document-based databases like Couchbase.
- Solid problem-solving skills, capable of investigating data issues, reviewing query logic, and supporting testing and release cycles.
- Business-level communication skills in English and Japanese and the ability to collaborate effectively in a global, cross-functional environment.

Company Description

This opportunity is with a large organization in the IT industry. The company operates on a global scale and is known for its innovative approach to technology and its commitment to delivering high-quality solutions.
