Job Description

Company and Job Overview
A fast-growing technology organization that partners with Japanese clients to deliver high-quality web applications and enterprise systems. We are seeking a Bridge Engineer who will act as the conduit between customers and the offshore engineering team—owning requirements, design documentation, and day-to-day project coordination to ensure on-time, high-quality delivery.

Job Responsibilities

- Work directly with Japanese stakeholders to clarify business and technical requirements and align on priorities and scope.
- Translate business needs and quality standards into clear specifications for the offshore development team.
- Build project plans, track progress, and manage risks and issues to meet delivery timelines.
- Create and maintain design documentation (e.g., basic and detailed design).
- Support product development for customer management systems; participate in coding and testing when needed

Job Requirements

- Japanese language proficiency at N2 or higher.
- 3+ years of experience as a Bridge Engineer, Project Leader, or Project Manager.
- Hands-on experience with web application development and the Scrum/Agile process.
- Proficiency with Java or PHP; strong requirement analysis and communication skills.

- High sense of responsibility, strong teamwork spirit, and continuous learning mindset—including interest in AI technologies and use of AI tools to enhance productivity.

Benefit

- Competitive and attractive salary, with performance-based bonuses
- One remote day per week.
- Regular salary reviews; certification allowances.
- Lunch allowance, free parking, and pantry refreshments.

- Team building, company trips, and social/health insurance as per local labor law.

Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
