Job Description

Company Overview

A company in the logistics and freight forwarding industry is hiring for an IT Manager.

Job Description

- Lead and manage core logistics systems to ensure stable, continuous operations across freight forwarding and supply chain activities.

- Own and optimize enterprise platforms including CargoWise One and other logistics, warehouse, accounting, and collaboration systems.

- Oversee EDI and API integrations with carriers and customs systems to support timely and accurate cargo clearance.

- Ensure infrastructure reliability, cybersecurity, and network stability across offices, branches, and warehouse

environments.

- Drive digital transformation initiatives, including the adoption of AI-based automation tools and IoT technologies for real-time operational visibility.

- Deploy and maintain technology platforms supporting digital marketing and online engagement.

- Collaborate with internal teams to implement tracking, analytics, and performance monitoring, ensuring data accuracy, security, and actionable reporting.

- Handle additional responsibilities related to IT operations and system governance as required.

Job Requirements:

- Bachelor's degree in information technology, computer science, or a related field.

- At least five years of IT experience, including a minimum of two years in a management role within logistics, freight forwarding, or related environments.

- Hands-on experience with enterprise systems such as CargoWise or similar platforms.

- Strong understanding of networking, database technologies, EDI protocols, and cybersecurity practices.

- Working knowledge of SQL, system configuration, or automation tools.

- Fluent Vietnamese language skills and business-level English for reporting and coordination with regional stakeholders.
