Job Description

We are looking for a data-driven professional who can lead analytics and data governance initiatives while working closely with business teams.

Key Responsibilities

- Lead data analytics and business intelligence activities, including dashboards and reports using Power BI
- Define and promote effective data usage practices to support digital and business improvement initiatives
- Manage data-related projects and coordinate with internal stakeholders
- Build and develop a data or digital team through coaching and knowledge sharing
- Promote data governance awareness and support structured data management across the organization

Qualifications

- Bachelor's degree in information technology, computer science, data-related fields, or business
- Good English communication skills with the ability to collaborate across teams
- Experience using data analytics and visualization tools such as Power BI, advanced Excel, and data preparation tools like Power Query
- Basic knowledge of analytical programming or scripting (e.g., Python) and general data management concepts
- Experience in business or operational data analysis, with a willingness to continuously learn
