Job Description

Hiring Position: Design Engineer

Location: **Phanthong, Chonburi**

Total package: 40,000 - 50,000 (depend on experience)

Job description:

- Lead the design and development of key automotive components, including Wheel Sensors, Kick Sensors, and Door Mirrors.
- Translate complex client requirements and drawings into clear, definitive product specifications and design criteria.
- Serve as the main technical point of contact for clients and internal teams for design negotiation and specification finalization.
- Drive design evaluations within the development team and negotiate design changes with related internal

departments to ensure successful project delivery.

Qualifications:

- Experience in developing complete automotive products, including both mechanical and aesthetic (exterior/interior) components.
- Proficiency in CAD software is required, with a mandatory requirement for CATIA V5.
- Strong ability to conceptualize specifications and perform detailed drafting.
- Experience with Fault Tree Analysis (FTA) and Failure Mode and Effects Analysis (FMEA) methodologies.
- Previous product design experience across various industries (Automotive, Electronics, Architecture, etc.) will be considered a plus.
