### Job Description

#### COMPANY OVERVIEW

A well-established technology services company delivering IT solutions, infrastructure support, and outsourced operational services. It works with clients across various sectors to enhance efficiency and strengthen digital capabilities.

#### JOB RESPONSIBILITIES

- Design, develop, test, and deploy PL/SQL stored procedures, functions, packages, triggers, and scripts.
- Optimize existing PL/SQL code for performance and maintainability.
- Work closely with application developers, data engineers, and business analysts to translate functional requirements into technical database solutions.
- Manage and maintain Oracle database structures including tables, views, indexes, and constraints.

- Conduct data analysis, data validation, and troubleshoot data inconsistencies.
- Assist with performance tuning, query optimization, and database debugging.
- Support data migration, ETL processes, and integration activities across systems.
- Ensure data security, quality, and compliance with company's policies.
- Participate in code reviews and documentation of technical solutions.
- Provide production support for database-related issues.

#### JOB REQUIREMENTS

- Bachelor's degree in Computer Science, Information Technology, Engineering, or related field.
- Atleast 3 years of hands-on experience in Oracle PL/SQL development.
- Hands on experience in:
  - PL/SQL programming (packages, procedures, functions)
  - SQL query writing and optimization
  - Database schema design and data modelling
  - Performance tuning using Oracle tools (Explain Plan, TKProf, etc.)
- Experience with Oracle 11g/12c/19c or higher.
- Strong SQL scripting skill in modifying complex queries and stored procedures.
