Job Description

Key Responsibilities

- Infrastructure operations and operational design for service delivery
- Evaluation and implementation of cloud-native solutions
- Designing and supporting customer cloud environments as a cloud architect
- Establishment and systematization of shared delivery models

- Implementation and promotion of automation solutions
- Due diligence, operational migration, and customer discussions related to IT outsourcing

Depending on experience, you may also be involved in:

- Estimating operational scope for new proposals
- Operational design and operational migration
- Optimizing and expanding operational services with a focus on shared operations

Required Skills

Requirements

- Experience in **operational design** during the operational phase of public cloud environments (AWS, Azure, etc.)
- Hands-on experience operating public cloud environments such as **AWS and Azure**
- Experience designing and building public cloud infrastructure
- Ability to assess customer environments, define ideal future states, and propose improvements
- OS-level knowledge of **Windows Server and Linux/Unix**

Preferred Qualifications

- Experience with **PaaS services** in addition to IaaS (e.g. databases, containers)
- Experience with multiple cloud platforms (AWS, Azure, GCP, OCI)
- Experience implementing **automation** to improve operational efficiency (Python, shell scripting, etc.)
- Experience managing teams
- Experience working with **overseas or global team members**
