### Job Description

Join a global team that helps organizations turn bold ideas into real-world impact. Working alongside talented colleagues across the world, you'll help clients rethink how they use technology to grow, innovate, and build a more sustainable future. From shaping strategy to designing and engineering cutting-edge solutions in AI, cloud, and data, you'll be part of projects that solve meaningful challenges and create lasting value for businesses, communities, and your own career.

#### Role Overview

- Support day-to-day management of a ~40-person data and analytics team covering:
  - Applied AI/ML
  - Data architecture
  - Data engineering

- Data visualization
  - ERP analytics
  - Act as a strategic advisor to executive-level clients, primarily in financial services (insurance focus, plus banking and capital markets), as well as other industries.
  - Lead client engagements from opportunity shaping through delivery, ensuring measurable business value.
  - Translate complex business requirements into scalable, secure, end-to-end architecture solutions across major cloud platforms (AWS, Azure, GCP).
  - Provide technical leadership across cross-functional teams.
  - Drive business development activities such as proposal creation, client presentations, solution design, and deal closure.
  - Own and deliver against revenue targets, utilization goals, and team performance KPIs.
  - Represent the team in regional and global forums and contribute to thought leadership in data and AI strategy.
- 

## Required Skills

- 10+ years of consulting or relevant industry experience in data, analytics, or digital transformation.
  - Strong background in solution architecture with recent experience in strategic advisory and business development.
  - Deep expertise across:
    - Data strategy
    - Applied AI/ML
    - Enterprise data architecture
  - Ability to present to and influence senior stakeholders and lead executive-level discussions.
  - Experience managing large teams, complex programs, and multiple workflows.
  - Proven experience owning project P&L and consistently meeting revenue targets.
  - Cloud solution architect certification (AWS, Azure, or GCP) is highly preferred.
  - Strong communication and leadership skills
-
