Job Description

The Company:

Our client has been growing steadily and is emerging as a leader in its industry. With a mission to create fair markets and support Japan's transition to a green society, this role offers the opportunity to play a key part in shaping the company's future.

The Role:

While working closely with executive and business leaders, you will lead initiatives end-to-end, from strategy formulation and KPI design to building analytical foundations and execution support.

Specifically, you will handle...

- Company-wide strategy and project execution, including business and departmental planning
- Organisational and KPI design, with ongoing monitoring and improvement
- Data collection, analysis, and visualisation to identify issues, form hypotheses, and drive improvements
- Management reporting and PDCA facilitation, integrating quantitative and qualitative insights

Required Skills**Ideal Requirements:**

- Strong data analysis skills, using SQL or similar tools
- Deep understanding of business KPIs, translating data and customer feedback into actionable improvements
- Experience defining analytical data and management accounting requirements based on business structure

Nice to Haves:

- Experience building and operating BI dashboards
- Background in data analysis or DX projects, including consulting environments
- Experience in company-wide FP&A or corporate planning, supporting executive decision-making with insights

PLEASE NOTE: If you feel like you have most of what we are looking for, but are missing some things - APPLY!!!
