Job Description

Company Overview

A company in the financial services industry is hiring for an EFX Trading Application Specialist. The organisation operates complex front-office and operational systems that support global FX trading activities. With a strong emphasis on system stability, regulatory compliance, and cross-regional collaboration, the company provides a dynamic environment where technical expertise contributes directly to business continuity and trading performance.

Job Description

- Ensure stable operation of core applications supporting front-office and operational functions, including trade capture and liquidity management.
- Respond to incidents, resolve issues within agreed timeframes, and manage service requests to minimise business disruption.
- Conduct root cause analysis, document findings, and implement preventive measures or minor enhancements in collaboration with internal teams.

- Monitor application performance by assessing latency, throughput, and error metrics, and propose improvements to optimise efficiency.
- Maintain documentation for incidents, configurations, and operational procedures in alignment with audit and compliance requirements.
- Communicate effectively with global stakeholders across multiple time zones, coordinating with front-office teams, IT groups, and regional support members.
- Support change management activities, including validating and implementing system changes during maintenance windows, and participate in global on-call rotation.

Qualifications

- Experience in technical application support within a financial or systems-driven environment.
- Strong analytical skills with the ability to investigate issues, identify root causes, and propose long-term solutions.
- Understanding of FX products and workflows within a trading-related context.
- Ability to monitor system performance and interpret operational metrics.
- Familiarity with regulatory and compliance expectations for system operations.
- Effective communication skills for coordinating with global teams and stakeholders.
- Japanese language proficiency is highly desirable.
