Job Description

Supply Operations Manager – AI Solutions Project | Global Technology Platform (Hybrid / Tokyo)

A global technology platform is expanding its **AI Solutions operations** and is seeking a driven **Supply Operations Manager** to support the growth of its AI talent network across East Asia.

This role will focus on building and scaling the supply of skilled professionals supporting next-generation AI initiatives. You will play a critical role in designing sourcing strategies, optimizing operational processes, and driving programs that enable AI solutions to scale efficiently.

This is a unique opportunity to contribute directly to the operational backbone of cutting-edge AI projects while working closely with international teams.

Key Responsibilities

- Develop and execute strategies to acquire and grow talent networks supporting AI solutions projects
- Build and manage sourcing pipelines through multiple channels and platforms
- Lead operational programs from planning through execution and continuous improvement
- Collaborate with global and regional stakeholders to support AI operational initiatives
- Track performance metrics and improve operational efficiency through data-driven decisions
- Identify opportunities for automation and process optimization
- Maintain dashboards and reporting to monitor operational performance
- Support expansion of AI operations across East Asia

Requirements

- Experience in operations, business operations, marketplace operations, or program management
- Proven ability to manage projects and operational initiatives
- Experience working cross-functionally with multiple stakeholders
- Strong analytical and problem-solving skills
- Ability to operate effectively in fast-paced, evolving environments
- Strong organizational and communication skills

Preferred Experience

- Experience supporting AI, technology platforms, or data-driven operations
- Experience managing external talent networks, vendors, or partners
- Experience scaling operational programs in high-growth environments
- Experience working in global or regional roles

Work Environment

- Hybrid work model (Tokyo-based)
- International team environment with global exposure
- Opportunity to support large-scale AI solutions initiatives
- Fast-paced, innovative, and growth-oriented organization

Why This Role?

- Work at the forefront of AI solutions and global technology innovation
- Play a key role in scaling operational infrastructure for AI programs
- Collaborate with international stakeholders and cross-functional teams
- Excellent opportunity to grow your career in AI operations and program management

Company Description
