Job Description

Support large-scale business systems and platform development within a major global organization. Seeking a strong QA leader to drive quality strategy across major initiatives on teams that operate complex, high-traffic platforms.

Overview

- Lead and manage a QA team of 5+ members on large-scale projects
- Define and execute overall test strategy and quality governance
- Oversee test planning, execution, defect management, and release readiness
- Drive collaboration across product managers, engineers, and project managers
- Improve QA processes, standards, and best practices across teams
- Monitor quality metrics and proactively manage risks and issues

This role would suit someone who enjoys leading teams, shaping testing strategy, and driving measurable quality improvements across complex systems within a large-scale tech environment.

Required Skills

- 5+ years of QA experience in software development environments
 - Proven experience leading at least 5 team members on enterprise-level projects
 - Strong understanding of SDLC and testing methodologies
 - Experience with manual and/or automation testing leadership
 - Strong stakeholder communication and cross-functional coordination skills
 - Business-level English (no Japanese required)
 - Willingness to commute 4 days a week to office in Tokyo (mandatory)
-
