## Job Description

**The Company:**

We are hiring for a major tier 1 supplier for the automotive industry. They have a strong global presence and a history spanning more than 100 years.

They are also firmly established in Japan, and are pioneering R&D in the EV market, autonomous driving, connected-vehicle development, and many other such innovations.

**The Role:**

You will be joining a global company and working on projects that will keep your skills fresh and your career competitive.

You will contribute to one of the largest ongoing projects within this company by taking ownership of ...

- Test Strategy & Specifications
- Test Environment & Execution
- Analysis & Reporting

And the results of all your hard work will be directly translated to real-world and visible improvements, which you will be able to see for yourself.

## Required Skills

**We're looking for someone who is ...**

- Genuinely passionate about automobiles
- Looking to build a long-term career alongside their next employer
- Not afraid to speak their mind and voice their opinions

**We need you to have ...**

- At least 3 years' experience in the Automotive industry
- Experience in system testing or validation
    - Test automation using scripting languages
    - Experience using version control systems like Git
- Experience in or knowledge related to embedded systems
- English: Business level
- Japanese: Roughly JLPT N3 (You will be interviewed in Japanese)

**What you will get:**

- A chance to work on the most cutting-edge projects that are currently shaping the industry
- A stable environment with diverse, open, and kind team members
- Space to grow your career in-house, with great external mobility as well
- And a lot more that we can discuss over the phone or via a video call!

## Company Description
