Job Description

A world's leading Insurance service provider is looking for a Network Architect – GCP Migration to support the migration of Japan's servers and applications to Google Cloud Platform (GCP) from a network perspective.

This includes analyzing network routing, firewalls, DNS, and load balancers to ensure a seamless migration process.

Responsibilities:
- Design enterprise grade network architecture for GCP migration (hybrid connectivity, routing, firewalls, DNS, load balancing)
- Define targetstate network blueprint aligned with global standards
- Present architecture proposals for global review and approval
- Ensure compliance with global security and governance frameworks
- Oversee vendor solution design and validate technical deliverables
- Be part of L3/L4 escalation leadership team along with Service Provider (Accenture), for any major network incidents
- Align Japan network roadmap with global cloud transformation strategy
- Drive continuous optimization of performance, cost, and resiliency

Why should you apply?
- This is a long-term opportunity
- You will be working with international team members
- Learn new skills while working on a large-scale project

Company Details: A leading international insurance organization operates in over 130 countries and jurisdictions, offering services to commercial, institutional, and individual clients through one of the most extensive global property and casualty insurance networks. In addition to general insurance, the organization is also a prominent provider of life insurance and retirement services in the United States. Its common stock is publicly traded on both the New York and Tokyo stock exchange.The group's Japan-based affiliate provides IT-related services to support the organization's operations within the country.

Working Hours: 9:00 - 17:30 (Mon-Fri)
Working Style: Hybrid (4 days in office, 1 day work from home)
Holidays: Saturday, Sunday, National Holidays, Year-end and New Year Holidays, and so on
Services/Benefits: Social insurance, Employee Pension Scheme, Transportation Fee

Required Skills

- 10+ years enterprise networking experience
- Strong GCP network architecture experience
- Deep knowledge of routing, switching, firewalls, load balancers, DNS, proxies
- Experience in large global environments (200+ sites)
- Strong understanding of SDN (Cisco ACI, Juniper Mist, etc.)
- Proven experience designing hybrid cloud connectivity
