## Job Description

- Design and deliver automotive voice interaction solutions, with a focus on Japanese ASR use cases.
- Analyze product and customer requirements and translate them into technical and system level specifications.
- Support ASR data preparation, evaluation, tuning, and validation.
- Define and execute ASR and voice feature testing, including competitive benchmarking.
- Perform ASR error analysis and work with R&D teams on optimization and issue resolution.
- Support end-to-end system testing, customer validation, and project delivery.

- Act as a technical interface to customers for requirement clarification and issue analysis.
- Collaborate with product, R&D, QA, and program teams to ensure on-time, high-quality delivery.
- Communicate effectively with cross-regional teams (Japan, China, and global
