### Job Description

**■Job description**

-You will be responsible for promoting digital transformation for our customers using the ERP package and core system D365.

-As an end-to-end service for core system implementation projects, you will be responsible for everything from requirements definition to design, development, testing, and offshore management.

-After design, you will communicate the specifications to the appropriate department in the offshore project team, manage the project progress, and connect to offshore development.

-You will be responsible for reviewing and inspecting deliverables before release to customers, and for operational support after release, building ongoing customer relationships.

### Required Skills

Eligibility to apply\*Please apply if any of the following applies to you.

- Experience implementing D365 product implementation projects as a business/application consultant/designer
- Experience implementing projects using D365 products (especially D365 FO, SCM, CRM)
- Experience implementing ERP (regardless of product), experience implementing products such as Oracle
- Experience in system development and system implementation, and want to try projects using D365
