Job Description

• Design, build, and operate infrastructure and cloud environments (on-premise, AWS, Azure, GCP, etc.)

• Understand customer requirements and collaborate with team members to define optimal system architectures

• Create and maintain requirements documents and technical specifications

• Participate in client meetings and support requirement definition and coordination

• Collaborate with domestic and international project members to deliver successful outcomes

• Gradually expand responsibilities based on experience and skill level

Required Skills

• Basic knowledge of on-premises and cloud platforms (AWS, Azure, etc.)

• Understanding of cloud migration project processes

• Fundamental knowledge of servers, networks, or security

• Basic project management skills (progress tracking, task and schedule management)

• 2+ years of experience creating PowerPoint presentations and explanatory materials

Company Description
