### Job Description

Join a global team that helps organizations turn bold ideas into real-world impact. You will work alongside talented colleagues across the world to help clients rethink how they use technology to grow, innovate, and build a more sustainable future. From shaping strategy to designing and engineering cutting-edge solutions in AI, cloud, and data, you will contribute to meaningful projects that create lasting value for businesses, communities, and your own career.

- Responsible for client program Delivery management, Status reporting and Team management
- Manage program dependencies, risks/issues, and mitigations
- Create project plan and define base timeline based on the known scope and dependencies
- Identify key WBS tasks, dependencies, critical path, roles, and resources

- Align milestones with overall program plan, review data migration plan timeline and dependencies
  - Responsible for managing offshore resources and align communication with onsite team members
- 

### Required Skills

- 10+ years project management / project delivery with application development background
  - 5+ years working experiences with onsite/offshore delivery model
  - Solid track on large scale project delivery, resource and budget management, with both Waterfall and Agile project management methodologies
  - Strong sense on issue, risk management, and proactive project quality control
  - Strong communication and presentation skills
  - Strong technical knowledge on cloud, data, and/or AI
  - Insurance product and operation knowledge and/or experiences
-
