Job Description

Position: Engineering Supervisor

Basic Salary: Maximum 32,000 THB/Month + Other Allowance

Job Description:

Production Engineering

- Supervise and control engineering activities in steel cutting, forming, and welding processes
- Oversee machines such as automatic cutting machines, gas cutting, plasma cutting, and CNC machines
- Design and develop jigs, fixtures, and holding devices for welding and assembly processes

- Improve manufacturing processes to reduce scrap and increase productivity
- Troubleshoot technical issues related to drawings, specifications, and shop floor operations
- Prepare work instructions (WI) and technical reports

Customer Coordination

- Communicate and coordinate with Thai and Japanese customers
- Clarify product specifications, drawings, and welding standards
- Provide progress reports and project updates to customers
- Handle drawing changes, engineering change requests (ECN), and technical discussions
- Participate in customer meetings regarding technical matters

Qualifications:

- Bachelor's Degree in Mechanical Engineering, Manufacturing Engineering, Industrial Engineering, or related field.
- Minimum 3–5 years of experience in steel structure fabrication or welding manufacturing
- Experience in jig and fixture design.
- Proficient in AutoCAD, SolidWorks, or other relevant design software.
- Experience in customer coordination is required.
- Good command of English (Japanese language skills will be an advantage).
- Strong leadership, problem-solving, and communication skills.
