Job Description

Tokyo-based technology division where you will leverage your project management skills to successfully deliver projects in the industrial/manufacturing sectors. The role requires strong ability to drive efficient project execution and promote collaboration across teams.

Client Details

A major corporate group operating both domestically and internationally, known for its focus on cutting-edge technology and high-quality service delivery. The organization runs multiple projects simultaneously and seeks talent who can combine technical expertise with strong project-driving capabilities.

Description

- Planning, requirements definition, and progress management of engineering and other technical projects
- Coordination and communication with technical teams, business stakeholders, and external vendors
- Risk management, issue management, schedule management, and roadmap planning
- Quality control and support for release processes
- Process improvement and optimization to enhance overall project execution

Job Offer

- Competitive salary and benefits
- Comfortable and supportive work environment based in Tokyo

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Riko Ichio +81366276091.

Required Skills

- Business-level Japanese proficiency (Japanese nationals welcomed)
 - Experience as a Project Manager or Project Lead in technical projects (Agile experience a plus)
 - Basic understanding of system development, digital products, infrastructure, or web technologies
 - Experience using project/issue management tools such as Jira, Backlog, or Asana
