Job Description

You will be working as a project manager (PM) in systems development for the airport sector.
Specifically, you will be responsible for upstream design and overall project management, including system proposals to airline customers, business analysis, requirements definition, customer negotiations, and team communication. You will work together with other members of our global ONE TEAM to advance development.

Those in managerial positions and above will also be responsible for managing personnel resources and income and expenditures.

Required Skills

[Requirements]
・Experience in system development in the airport field.
・Experience as a PM (Project Manager).

[Preferred conditions]
・Experience developing systems used by airport companies

・Time attendance management systems
・Web sales systems
・Business knowledge in the airport field
・Experience in offshore development
・Experience as an IT architect
