Job Description

Job Description:
Lead system planning and proposal to design.
Responsible for proposal activities and basic design for cutting-edge projects in the consumer field, such as data POS for beverage vending machines, food consumption prediction systems, and SCM visualization services. Serving as the overall lead for pre-sales and project promotion, he will be responsible for the overall direction and quality control of the project.

Promote package development
・Utilize industry-standard packages and existing solutions to lead customization and expansion according to customer requirements
・In particular, as an upstream SE for consumer systems such as PoS payment terminals, you will be responsible for the design and oversight of the entire system

Collaboration with related companies
- Accurately understand the requirements of clients (major beverage, vending machine, distribution, food industry, etc.) and promote smooth system construction in collaboration with technical teams and offshore partners
- Contribute to the success of projects through project management, technical evaluation, quality assurance, etc.

Required Skills

[Requirements] Please apply if you meet any of the following requirements:
- Practical experience in the entire process from proposal to design of retail and consumer system development (EC, POS, payment, SCM, etc.) -
Experience in upstream design of consumer-related products such as PoS payment terminals

[Preferred conditions]
・Knowledge and experience in related fields such as aviation, airports, and ports
・Project experience for major IT vendor clients
・System proposal and design experience in multiple industries (beverages, vending machines, food, retail)
・Offshore collaboration experience in global projects
