## Required Skills

**Why We Are Hiring**
As our global footprint expands, English has become our primary language for development. However, our management and administrative functions operate in Japanese. We are looking for a dedicated professional to ensure seamless alignment and clear communication between our leadership and our world-class engineering talent.

**Requirements**

・Professional Experience: Proven experience in translation and interpretation (English/Japanese).

OR

・Industry Knowledge: Candidates without formal interpretation experience will be considered if they possess strong IT industry knowledge and high confidence in their linguistic abilities.

**Preferred Qualifications**

・Experience in or fundamental knowledge of software development processes.

Note: Technical terminology can be learned on the job; a proactive learning mindset is highly valued.

**What We Offer**

**Impact:** Play a critical role in globalizing a high-growth startup and ensuring the success of complex international projects.

**Growth**: No deep technical expertise is required at the start—we provide the necessary support to help you master technical terminology and industry workflows.

**Cutting-Edge Domain:** Gain rare and valuable experience working at the forefront of AI technology and next-generation data center infrastructure.
