Job Description

Why You Should Apply

- Lead the network layer of a large-scale migration of servers and applications to GCP
- Impact over 200 sites across Japan and global locations
- Report directly to the Head of International Network Services (global function)
- Transformation-focused role involving architecture design and global alignment
- Enterprise-scale environment within a structured Fortune 500 organization

- Compensation: 900,000–1,100,000 JPY per month + transportation + overtime

Responsibilities

- Design and develop network solutions to support GCP migration in alignment with global standards; document and present solutions for global review.
 - Collaborate with third-party vendors to manage and ensure successful solution delivery.
 - Provide escalation support for critical operational services and project implementations.
 - Build and maintain strong relationships with Japan business teams, IT teams, and external vendors to ensure high-quality network services.
 - Foster effective cross-functional collaboration with infrastructure and IS departments to advance IT initiatives and support end users.
 - Establish and maintain productive working relationships with key stakeholders, project sponsors, and vendor partners.
 - Communicate effectively with staff and management at all levels, both internally and externally.
 - Identify and propose opportunities to enhance engagement between IT teams and business users.
 - Work closely with global teams and key vendors to ensure compliance with global standards and alignment with organizational priorities.
 - Contribute to the continuous improvement of network services and operational processes.
-

Required Skills**Required Skills:**

- Bachelor's degree or higher, or equivalent combination of education and experience.
- Experience in deploying and supporting routing and switching, wireless networking, firewalls, load balancers, proxies, DNS, and DHCP within largescale corporate environments.
- Experience with Software Defined Networking (SDN) solutions such as Juniper Mist or Cisco ACI.
- Experience supporting cloud infrastructures such as AWS or GCP.
- Experience working in complex global and domestic network environments with 200+ sites.
- Relevant certifications such as CCSP, CCDP, CCNP, CCIE, or equivalent expertise.

Languages:

- Japanese level: Advanced (N2 or above)
