Job Description

We are seeking an experienced Product Manager to drive the strategy, development, and growth of digital products within a large-scale platform environment. In this role, you will work closely with cross-functional teams to identify business opportunities, define product requirements, and deliver solutions that create measurable customer and business value.

The ideal candidate has a strong background in product management within the IT or digital services industry and enjoys solving complex problems in fast-paced, collaborative environments.

Product Strategy & Planning

- Identify business opportunities and define product strategies aligned with organizational goals
- Translate business challenges into product concepts and value propositions
- Define product roadmaps, success metrics, and key performance indicators
- Develop product requirements and guide product development priorities

Product Development & Execution

- Own products or features end-to-end, from planning through launch and ongoing improvement
- Work closely with engineering, design, marketing, and business teams to deliver high-quality products
- Coordinate cross-functional teams to ensure successful product delivery
- Drive continuous iteration and improvement based on user feedback and data insights

Performance & Impact Measurement

- Monitor product performance and business metrics to evaluate success
- Use data-driven insights and experimentation to optimize product outcomes
- Identify opportunities for growth, improvement, and operational efficiency

Stakeholder Management

- Collaborate with stakeholders across business, technology, and operational teams
- Communicate product strategy, progress, and results clearly to leadership and partners
- Manage risks, priorities, and trade-offs throughout the product lifecycle

Required Skills

- Experience managing digital products within an IT or technology-driven environment
- Proven experience owning product initiatives with responsibility for business outcomes
- Experience defining product requirements and working closely with engineering and design teams
- Strong analytical and problem-solving skills with a data-driven mindset
- Ability to operate effectively in fast-paced and ambiguous environments
- Strong stakeholder management and communication skills
- Business-level Japanese and business-level English

Preferred Qualifications

- Experience working on large-scale digital platforms or services
- Experience collaborating with cross-functional teams across product, technology, and business functions
- Experience mentoring or guiding team members
