Job Description

COMPANY OVERVIEW

A well-established technology services company delivering IT solutions, infrastructure support, and outsourced operational services. It works with clients across various sectors to enhance efficiency and strengthen digital capabilities.

This is an agency contract role (renewable).

JOB RESPONSIBILITIES

- Improve, support, and migrate customer-specific systems built in VB.NET and VB6.

- Develop new features and APIs in Node.js as part of the system replacement initiative.

- Perform unit testing (UT) and system testing (ST).

- Review and analyse existing source code to understand requirements and identify issues.

- Provide timely updates and issue reports to the Development Lead and participate in customer meetings and onsite discussions.

- Carry out defect analysis and troubleshooting, including onsite support when necessary.

- Prepare required technical documents such as design specifications and test documentation.

JOB REQUIREMENTS

- Bachelor's degree in IT or a related discipline.

- At least 5 years of experience in software development.

- Strong practical experience with VB.NET, VB 6.0, and Node.js.

- Able to manage programming tasks, unit testing (UT), and system testing (ST).

- Background in migrating or modernizing systems from legacy VB/VB.NET to Node.js.

- Willing to work onsite at the customer location with a high in-office presence.

- Able to coordinate closely with the Development Lead in a single-developer environment.

- Experience in system modernization or migration initiatives is good to have.

- Experience working with financial or enterprise-level systems is good to have.
