Job Description

Job Description

- The Engineer/Senior Engineer (Mechanical) is responsible for coordinating all mechanical engineering works including HVAC, piping, and related M&E systems, ensuring compliance with approved drawings, specifications, and authority requirements.

Key Responsibilities

- Review mechanical design drawings, specifications, and technical submissions.
- Coordinate with consultants, subcontractors, and suppliers to resolve technical or site issues.
- Manage shop drawings, method statements, and material submissions.
- Monitor site installation of mechanical systems to ensure quality and compliance.

- Conduct inspections, testing, and commissioning activities.
- Support project team on mechanical-related design and construction matters.
- Participate in QA/QC reviews and ensure adherence to project requirements.
- Implement all procedures as required by Kajima Total Management Systems.

Requirements

- Degree/Diploma in Mechanical Engineering.
- Experience in mechanical engineering in construction or industrial projects.
- 5 to 6 years of working experience in data center, factory and warehouse projects
- Strong technical knowledge in HVAC, piping, fire protection, and mechanical systems.
- Ability to read and interpret engineering drawings.
Good communication and coordination skills.
