Job Description

Looking for a Maintenance Group leader in Becharaji, Gujarat with Japanese Automotive Parts manufacturers.

Principle Areas of Accountability:

- 1- Preventive/Predictive Maintenance: Develop and execute schedules to maximize equipment uptime and prevent breakdowns.
- 2- Troubleshooting & Repairs: Perform advanced diagnosis and repair of mechanical, electrical, hydraulic, and pneumatic systems.
- 3- Reliability Improvement: Analyze equipment performance data to implement improvements and increase efficiency.
- 4- Safety & Compliance: Ensure adherence to safety protocols (OSHA) and environmental regulations.
- 5- Team Leadership: Guide and mentor technicians, coordinate daily maintenance activities, and manage external contractors.
- 6- System Management: Utilize CMMS/SAP systems for maintenance planning, spare parts inventory management, and documentation.
- 7- Maintain accurate records regarding routine inspections of all mechanical equipment, safe handling procedures of chemicals, and daily work/project logs.
- 8- Provide on the job staff training. Generate communication to staff, suppliers, clients, and tenants regarding construction/maintenance work.

9. Maintenance of panasonic welding robots, MIG, TIG, SPM, CNC bender & press m/c. 10- Diagnose problems, replace or repair parts, detect and replace defective parts, test and adjust automated production equipment. Perform regular preventative maintenance on machines and equipment.

11- Experience in trouble shooting and equipment maintenance of electrical, mechanical, pneumatic, hydraulic and robotics problems on automated equipment.

12- Use of robotic systems to program and troubleshoot (Panasonic Robots & Panasonic power source).

13- Experience in trouble shooting and equipment maintenance of electrical, mechanical, pneumatic, hydraulic and robotics problems on automated equipment.

KEY COPETENCIES NEEDED:

1- PLC programming experience highly desirable (Mitsubishi Q-series and FX-series).

2- Maintenance of utility equipment like as ac, air washer, cooling tower, air compressor, ACB, VCB ECT.

3- Responsible for spare parts management & procurements.

4- Analysis of breakdown of machine starting from root cause problem to give best possible solution.
