Job Description

The candidate must possess one or more of the following:

- ① More than five years of experience in production engineering (equipment maintenance, facility management, and quality control) within the electrical or machinery manufacturing industry.
- ② Specialized knowledge in electrical/electronic engineering or mechanical engineering.
- ③ Troubleshooting skills for production equipment, particularly assembly and inspection machines.
- ④ Proficiency in both Tamil and English to enable smooth communication with local operators.

Preferred skills:

- A person with knowledge of semiconductors and electronic devices.

• **An individual with strong problem-identification skills and logical analytical ability, capable of resolving technical issues on the production floor and contributing to improving the level of quality and equipment management.**
