### Job Description

#### Company overview

Our client, a Japanese IT product company, is looking for a Software Engineer to join their team and contribute to various exciting projects.

#### Job Description

- Develop software that controls multifunction printers (MFPs) and related optional devices.
- Debug and test the software using real hardware or simulators.
- Work with technical partners by sharing specifications, requirements, and clear instructions for design and implementation.
- Ensure the final product meets quality standards and help improve development efficiency.

## Requirements

- 3+ years of software development experience using C/C++ or embedded software.
- Experience in creating technical documents, requirement analysis, debugging, and device testing.
- English: Intermediate proficiency (spoken, listening, and written).
