#### Job Description

Lead analyst who will launch the data analytics function and support product success through numbers. In a fast-paced business environment, you will own everything from building the analytics foundation to supporting decision-making.

**Client Details**

This is a specialized organization within a large group that operates a wide range of businesses both domestically and internationally, focused on building next-generation communication infrastructure for customer service. Leveraging large-scale traffic and diverse service data, we are driving innovation in customer interactions by incorporating generative AI.

**Description**

- Develop analysis plans in collaboration with product management to quantitatively identify customer issues
- Define KPIs for product success and design/build dashboards and other visualization tools
- Conduct exploratory data analysis to identify opportunities, test hypotheses, and propose product strategies
- Clearly explain complex analysis results to diverse stakeholders

- Optimize product features through experimental design and evaluation, including A/B testing
- Build and operate analytics infrastructure, including BI tools and data pipelines
- Support team growth through member development and management as the team expands

#### Job Offer

- Be part of a technology-driven organization in the business services industry.
- Work in a supportive and innovative environment in Tokyo.
- Opportunities to develop your skills in data analysis and technology.
- Working hours: 9:00 AM - 5:30 PM
- Remote work available
- Free meals at the in-house cafeteria

If you have the skills and experience to excel as a Data Analyst, apply now to join this exciting opportunity in Tokyo!

---

#### Required Skills

- 5+ years of hands-on data analytics experience (especially in product analytics)
- Advanced English communication skills
- Ability to collaborate with PMs and engineers and translate business issues into analytical tasks
- Extensive experience with data extraction and aggregation using SQL
- Experience building dashboards with BI tools such as Tableau, Looker, or DOMO
- Proven track record of turning analytical insights into business impact
- Leadership experience or strong motivation for team development
