Job Description

A Global Insurance firm is seeking a talented **Security Specialist** in the Technical Security & Assurance Team. You will be required to strengthen security controls and measures in applications and infrastructure to protect information assets from data leakage and unauthorized access.

Responsibilities:

- Conduct security reviews of IT architecture for various IT projects

- Define security requirements from the perspective of data protection such as encryption, data labeling, access controls, authentication and authorization in applications and systems
- Evaluate cloud services and ensure that security measures are properly implemented (SaaS/PaaS/IaaS)
- Conduct various security tests (penetration testing, etc..) to identify and remediate vulnerabilities in systems and applications
- Define policies for WAF/FW, assess risks of events that violate security policies, and consider/propose measures to reduce risks
- Respond to inquiries related to various security matters from IT and business departments
- Respond to security-related audits, create remediate actions and implement security measures to address identified issues

Why should you apply:

- This is a long-term opportunity
- You will be working with international team members
- Learn new technologies and on large scale projects

Company Details: A leading international insurance organization operates in over 130 countries and jurisdictions, offering services to commercial, institutional, and individual clients through one of the most extensive global property and casualty insurance networks. In addition to general insurance, the organization is also a prominent provider of life insurance and retirement services in the United States. Its common stock is publicly traded on both the New York and Tokyo stock exchange. The group's Japan-based affiliate provides IT-related services to support the organization's operations within the country.

Working Hours: 9:00 - 17:30 (Mon-Fri)

Working Style: Hybrid (4 days in office, 1 day work from home)

Holidays: Saturday, Sunday, National Holidays, Year-end and New Year Holidays, 27 Paid Holidays every year (20 paid leaves, and 7 especial leaves)

Services/Benefits: Social insurance, Employee Pension Scheme, Transportation Fee

Interview Process: 3

Required Skills

- 5 years of work experience in IT Infrastructure and/or Information Security
- Experience in IT Development or IT Operations
- Security review skills (Including cloud security and AI security)
- Good knowledge of industry standard, regulations and security best practices such as Privacy Mark, ISO 27K, NIST, etc.
- Strong communication and documentation skills
- Security assessment skills, and ability to propose security improvements
