Job Description

Our client is a well-established engineering company involved in power grid and energy infrastructure project across Malaysia. They are currently expanding their engineering team and looking for a Junior Project Engineer to support project execution and technical coordination for grid related projects.

Job Responsibilities: -

- Assist Project Manager and senior engineers in planning and executing grid and electrical engineering projects
- Support preparation of technical documents, project schedules and engineering reports
- Coordinate with internal engineering teams, contractors and suppliers to ensure project progress
- Monitor project timeline, technical issues and project deliverables
- Assist in site supervision and ensure work is carried out according to technical specifications and safety standards.
- Participate in project meetings, prepare meeting minutes and track action items.
- Support troubleshooting and technical analysis related to electrical systems or grid infrastructure
- Ensure compliance with project requirements, quality standards and engineering best practices

Requirements:

- Bachelor Degree in Electrical Engineering or related field
- Fresh graduates are encouraged to apply
- Ability to communicate in Mandarin is required to liaise with Mandarin speaking clients and project stakeholders.
- Strong communication and team abilities
- Willing to travel or work at project sites when required
