Job Description

We are hiring a Manual QA Engineer with experience in ecommerce or retail systems to execute manual testing, identify defects, and support product quality. This role requires low business-level Japanese for communication and collaboration with cross-functional teams.

Client Details

This company is in the retail sector, known for its focus on ecommerce and customer-oriented solutions. It operates in a fast-paced environment, delivering innovative and reliable products to meet business needs.

Description

- Perform manual testing on ecommerce and retail systems to ensure functionality and quality.
- Identify, document, and track software defects and inconsistencies.
- Collaborate with developers and other stakeholders to understand system requirements.
- Design and execute test cases based on functional specifications.

- Verify bug fixes and perform regression testing for updated systems.

Job Offer

- Chance to contribute to key ecommerce and retail technology projects.
- Supportive and professional work environment.
- Potential to enhance your skills in the retail industry.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

- Demonstrates hands-on experience in manual QA, with a solid understanding of testing processes and defect management.
 - Brings prior exposure to ecommerce or retail platforms and can quickly understand customer and business workflows.
 - Communicates effectively in business-level Japanese and collaborates smoothly with cross-functional teams.
 - Shows strong attention to detail, a proactive mindset, and the ability to work independently in a fast-paced environment.
