### Job Description

**Overview**

We are seeking a Design Engineer specializing in medical electrical cables to design, develop, and improve cable products that meet customer requirements, industry standards, and internal quality systems.

**Key Responsibilities**

- Design and develop medical cable products based on customer/project requirements.
- Review and analyze technical requirements, drawings, and standards.
- Create and update drawings, BOMs, and product documentation.
- Work closely with Production, Quality, Sales, and QA/QC during development.
- Conduct product testing and validation to ensure performance and compliance.
- Provide technical support for production issues.
- Improve designs for better performance, cost, and reliability.
- Ensure compliance with ISO 13485, IEC, RoHS, REACH, and related regulations.
- Prepare technical reports, documentation, and presentations.

**Requirements****Education:**

Bachelor's degree in Electrical, Electronics, Materials, or Mechanical Engineering.

**Experience:**

- Minimum 3 years in cable design or related fields (medical cable, wire harness, etc.).
- Experience working with U.S. or European customers is a plus.

**Skills:**

- Strong English communication skills.
- Solid understanding of cable design, materials, and manufacturing processes.
- Ability to read and interpret technical drawings and standards.
- Strong problem-solving, analytical, and communication skills.
- Comfortable working in a fast-paced, cross-functional environment.

**Notice:** By submitting an application for this position, you acknowledge and consent to the disclosure of your personal information to the Privacy Policy and Terms and Conditions, for the purpose of recruitment and candidate evaluation.
