Job Description

We are looking for a **Lead SDK Engineer** to drive the development of web-based SDKs and developer tools for a large-scale analytics platform. You will lead technical design, improve developer experience, and ensure seamless integration across multiple platforms.

Client Details

The client operates a large-scale data and analytics platform that aggregates online and offline user data for advanced analytics and marketing use. Their systems process billions of events in real-time and support critical business decisions across multiple services.

Description

- Lead development and maintenance of JavaScript/TypeScript SDKs for web applications
- Own and improve developer tools such as Chrome extensions and analytics debuggers
- Collaborate with cross-functional teams (Web, iOS, Android) for seamless SDK integration

- Design and implement features to enhance developer experience and platform usability
- Conduct code reviews and enforce best practices across the engineering team

Job Offer

- Long-term contract (initial 2 months, renewable every 3 months)
- Highly technical leadership role in a data-intensive environment
- Work on systems processing **billions of daily events**
- International, English-only engineering environment
- Working hours: **9:00 - 17:30 (Weekdays only)**
- Location: **Futako-Tamagawa, Tokyo**
- Opportunity to influence developer experience at scale

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

Required Skills

- 5+ years of experience in **JavaScript / TypeScript development**
 - Strong experience in **SDK development for web applications**
 - Proven experience leading development of widely-used SDKs
 - Deep understanding of modern frameworks (React, Angular, or Vue.js)
 - Experience with **unit testing frameworks (e.g., Jest)**
 - Familiarity with build tools such as **Webpack or Vite**
-
