Job Description

Responsibilities:
- Work with Chief Technology auditor to define audit strategy to address risks associated with applications, cloud, infrastructure, and emerging technology activities. This will include ensuring compliance with regional, country and global

regulations
- Lead and oversee the execution of the audit strategy coverage: Execute a global assurance plan and audit methodology for business processes and applications, cloud, infrastructure and data center activities, emerging technology activities, including continuous monitoring of regulatory developments and best practices
- Manage and Develop Teams: Build, coach, and maintain a highperforming team with cloud, transformation, and technology assurance skillsets; oversee talent management of offshore teams, staff evaluation, and hiring processes
- Engage Stakeholders and Influence Change: Proactively manage relationships with senior management, and other stakeholders; provide insights to drive sustainable improvements in processes and controls
- Deliver Audit Outcomes: Draft, review, and communicate audit findings and reports to executive management; participate in steering committees and working groups to promote balanced discussions and continuous improvement
- Driving the adoption of data analytics, AI, and automation in audit testing and risk assessment to enhance assurance efficiency and insight

---

Required Skills
