Job Description

Purpose of the Role

To manage sourcing and procurement activities for new and existing machined parts by identifying reliable suppliers, ensuring cost-effective procurement, supporting new product development, and driving continuous cost-reduction initiatives while maintaining the required quality and delivery standards.

Location: Chennai – VV1, SIPCOT Industrial Park, Vallam Vadagal, Sriperumbudur, Tamil Nadu – 602105

Job Specifications

Knowledge Requirements

- Sourcing and procurement processes
- New part development: identifying, qualifying, and developing suppliers to meet cost, quality, and delivery targets
- Cost estimation of machined parts and preparation of cost-down proposals
- Process analysis for cost-saving and efficiency improvement opportunities
- Identification and mitigation of cost-related risks
- Strong vendor and supplier relationship management

Key Responsibilities

- Research, identify, and evaluate potential suppliers
- Qualify and improve suppliers for new product development, ensuring they meet quality, cost, and delivery expectations
- Perform accurate part cost estimation and prepare cost-reduction ideas and proposals
- Analyze processes to identify opportunities for cost savings and efficiency enhancements
- Develop mitigation strategies for cost-related risks
- Build and maintain strong, long-term supplier relationships
- Conduct zero-base cost estimation for functional parts

Skills Required

- Knowledge of manufacturing processes, QMS, and problem-solving methodologies
- Experience in purchase development, cost management, and supplier management
- Proficiency in MS Office, Power BI, and related tools
