Job Description

- Deliver technical training and product demonstrations to customers, ensuring effective installation, operation, maintenance, and troubleshooting of Christie products.
- Oversee and coordinate technical on-site or remote activities, serving as the primary escalation point for complex issues and ensuring decisions align with established procedures.
- Provide advanced technical support through pre- and post-sales activities, resolving issues promptly, implementing interim solutions when needed and escalating unresolved problems.
- Perform advanced product repair, maintenance, installation, calibration, troubleshooting, commissioning, and integration services of Christie products.
- Serve as the technical authority during system design and tender stages, validating recommendations and ensuring alignment with strategic objectives.
- Support trade shows, events, and product demonstrations, ensuring equipment readiness and performance.
- Conduct site surveys to support project sales and maintain accurate service records, site reports, and project documentation on the server.
- Collect and analyze customer feedback on Christie and third-party systems, providing technical insights and recommendations when requested to support optimal system performance.
- Demonstrate Christie products to highlight unique selling points, ensure optimal performance, and confirm compatibility with

customer sources.

- Represent Field Applications Engineering team in cross-functional discussions and support continuous improvement initiatives.
- Prepare or assist in creating technical documentation, reports, training materials, and customer technical communications.
