Job Description

Our client is newly established manufacturing company in Malaysia. They are doing high-precision plastic machining. Currently they are looking for a Process Management professional to support their new manufacturing project. This role focuses on manpower planning, work-hour control, progress tracking and cost management to ensure production activities run efficiently.

- Industry: Industrial Machinery
- Location to Work: Sepang, Selangor (On-site / Factory based)
- Immediate Intake

Key Responsibilities: -

- Plan and manage manpower allocation and work hours based on internal production processes.
- Monitor daily and weekly production progress and ensure execution aligns with production plans
- Track and control manufacturing costs, including labor related expenses
- Identify deviations, risks or delays and report issues promptly to group management
- Coordinate closely with group management to resolve operational or process related issues
- Support continuous improvement in process efficiency and cost optimization

Requirements: -

- Diploma/ Degree in Industrial Engineering, Manufacturing Engineering
- Experience in process management, production planning, operations control or cost management
- Background from manufacturing, industrial or production environment is preferred
- Strong skills in planning, coordination and progress tracking
- Able to work with cross functional teams and report issues clearly
- Detail oriented, structured and comfortable working in fast paced production setting
