Job Description

Company overview

Our client is a leading organization in the financial services industry with a strong focus on digital transformation and data-driven decision making.

Job Description

- Design and build data modeling and data warehouse to support analytics needs.
- Develop and optimize ETL / data pipelines for large-scale data processing.
- Code and operate data platforms using Big Data technologies.
- Collaborate with Business Analysts / Data Analysts / Data Scientists to understand business requirements and data usage.

- Ensure data systems are stable, secure, and high-performing.

Requirements

- 4+ years of experience as a Data Engineer working with Big Data technologies (Spark, Hadoop, Kafka, etc.) and databases (SQL, NoSQL).
- Strong coding skills in Python / Java / Scala, AWS.
- Hands-on experience in enterprise data modeling, data warehouse design, ETL and data pipelines.
- Experience in monitoring, troubleshooting, and resolving issues in complex data systems.
- Experience in building high-performance systems or services is a plus.
- Good English communication skills for work purposes.
