Job Description

★★ Foreign engineers with business-level or higher Japanese proficiency are highly welcome! ★★

Why not start your engineering career in Japan?

- ◆ Fully online process — Everything from interviews to job offers is completed remotely!
- ◆ Visa sponsorship available — We provide full support for your visa application and acquisition.
- ◆ Relocation support provided — For candidates moving from overseas, we offer airfare to Japan (with a cap) plus a

relocation allowance of ¥100,000.

Requirements:

- Business-level Japanese proficiency or higher (JLPT N2 or above)
- At least 2 years of hands-on experience in IT infrastructure (e.g., help desk, servers, networking), or relevant certifications
- Conversational-level English or higher

Selection Process:

1. Application
 2. Casual interview (informal meeting)
 3. Document screening
 4. First interview (a second interview may be conducted if necessary)
 5. Job offer
- ※All meetings and interviews will be conducted online in Japanese.

Job Description:

You will be responsible for L1-level help desk and user support tasks at client sites.

While most duties are conducted in Japanese, some assignments may require communication in English depending on the project.

Examples of Assigned Projects:

L1 Support

- Bilingual help desk for multinational companies
- Bilingual support at the Japan office of a well-known global apparel brand
- Global help desk (in English) at internationally operating Japanese companies
- IT support and user support roles at IT companies

Career Path Examples:

At joining: Help Desk (L1) / Annual salary: ¥4,000,000

After 2 years: Operations and design for AWS/Azure environments / Annual salary: ¥4,500,000+

Current Position: Requirements analysis, AWS design, implementation, and operations / Annual salary: ¥6,000,000+

At joining: Network operations and design / Annual salary: ¥4,500,000

After 2 years: Security consulting support / Annual salary: ¥5,000,000+

Current Position: Design and implementation of security-related products / Annual salary: ¥6,000,000+

Why ISF NET?

[Point 1] A supportive workplace aiming for “Zero Workplace Relationship Concerns”

ISF NET has a strong culture of valuing people, where warm support from supervisors and colleagues is present throughout the organization. For example, employees who are not yet confident in Japanese are encouraged with words like, “Don’t worry—just speak with confidence,” creating a positive and supportive atmosphere. For employees raising children, the company respects work-life balance and offers flexible work arrangements. For international employees as well, systems are in place to help overcome language barriers, creating an environment where people from diverse backgrounds can work with peace of mind.

[Point 2] A growth-oriented environment that supports learning and fairly rewards effort

At ISF NET, employees receive an 8-day onboarding training program after joining, where they can thoroughly learn job-related knowledge and internal systems. Project assignments are made based on individual career goals and experience. Even after placement, employees can continue to upskill at their own pace through short- and long-term reskilling programs and access to over 400 e-learning courses. In addition, a performance-based point system is in place to fairly evaluate efforts, with achievements such as certifications, business contributions, and internal contributions reflected in salary increases. This ensures a motivating environment where each engineer’s efforts are properly recognized.

[Point 3] Comprehensive support for overseas applicants and international engineers

ISF NET provides extensive support systems to help overseas applicants and international engineers start working with confidence, including assistance with relocation, daily life, and employment in Japan.

- Partial coverage of airfare (up to a specified limit)
- Relocation support, including travel and moving allowances
- Visa application and acquisition support
- Company housing provided (single occupancy only / ¥35,000 per month)

About ISF NET:

ISF NET, Inc. is an IT infrastructure company that continues to grow alongside its engineers.

With offices in 18 cities across Japan, as well as in China, South Korea, and Singapore, the company employs over 2,000 engineers.

Currently, more than 270 international employees from 31 countries are actively working at ISF NET, creating a truly global team environment. Looking ahead to further international expansion, the company is actively recruiting talent throughout the year—not only within Japan, but also globally—for those who aspire to build an international career.
