Job Description

Job Title: Logistic Specialist - Semiconductor

Location: Singapore

Your New Company A global technology leader in the semiconductor and electronics industry is expanding its supply chain and logistics operations in Singapore. The organization operates in a highly advanced, multi-country environment and is known for its precision, reliability, and commitment to operational excellence across worldwide operations.

Your New Role As a Logistics Specialist, you will support and optimize end-to-end logistics operations across multiple regions. This role focuses on improving supply chain efficiency, managing logistics partners, driving process improvements, and supporting global stakeholders through strong data, systems, and cross-functional collaboration.

You will work closely with internal teams and external vendors to ensure warehousing, transportation, and inventory processes operate efficiently, cost-effectively, and in line with global standards. **Key Responsibilities** 1. Logistics Operations & Supply Chain Management

- Oversee and continuously improve logistics processes across warehousing, shipping, receiving, and inventory management.
- Support logistics operations in a multi-country and global (WW) environment. Monitor logistics performance, service quality, and operational effectiveness.

2. Vendor & Partner Management

- Manage and work closely with transportation providers and warehousing partners.
- Ensure supplier performance, contract compliance, and cost efficiency.
- Participate in evaluating transportation, warehousing, and inventory-related costs against budget and distribution strategies.

3. Process Improvement & Systems

- Drive process optimization initiatives to improve efficiency, reduce cost, and enhance service delivery.
- Support logistics process engineering within ERP systems (Oracle preferred).
- Identify opportunities for automation and digital tools to improve logistics workflows.

4. Data, Reporting & Analysis

- Collect, analyze, and interpret logistics and supply chain data.
- Prepare management reports covering performance, cost, and operational metrics.
- Support decision-making through data-driven insights.

5. Cross-Functional & Regional Support

- Act as a key support contact for regional and global stakeholders.
- Participate in and support cross-functional initiatives across supply chain, operations, and finance.
- Provide flexible support to global customers and regional teams when required.

Qualifications

- 3–5 years of relevant experience in logistics, supply chain, or operations roles.
- Experience in semiconductor, electronics, or high-tech manufacturing environments is an advantage.
- Hands-on knowledge of logistics processes, including warehousing, transportation, and inventory management.
- Familiarity with Oracle or similar ERP systems preferred.
- General understanding of cross-border trade compliance and logistics regulations.
- Strong analytical, problem-solving, and critical-thinking skills.
- Proficient in Excel and comfortable working with operational data and reports.
- Strong communication skills and ability to collaborate across regions and cultures.

- Well-organised, self-driven, and adaptable to managing multiple priorities.
- Exposure to project management or robotic process automation (RPA) is an added advantage.
