Job Description

COMPANY OVERVIEW

Our Client is a well-established Japanese Corporation and they are launching new facilities for environmentally friendly woodboard and biomass materials, as well as conducting research into new biomass boards and fuel pellets. The company is committed to advancing green business initiatives and creating innovative product value through technology and sustainable practices.

JOB RESPONSIBILITIES

- To facilitate new plant setting up of new biomass plant, working closely with Internal Management, Plant Contractors and Material Suppliers.
- Investigate customer specifications related to eco-friendly materials and provide clear summaries for internal use.
- Establish new production facilities and conduct quality verification to support product launch and improvement.
- Drive research and development as well as optimization studies for biomass-based products.

- Prepare analysis and progress reports and monthly updates.
- Propose technical ideas that contribute to new product value and support the organization's goals in green material development.

JOB REQUIREMENTS

- Bachelor's Degree in Chemical Engineering, Mechanical Engineering, Environmental Sciences or equivalent.
- Preferably with at least 2 years of experience handling new plant setup / plant upgrade project, exposure to biomass, wood-based manufacturing or oil palm processing industry would be added advantage.
- Strong interest in Green Technology Projects as well as willingness to take on new challenges and adopt an innovative mindset, fresh graduates with relevant internship project experience are welcomed.

Interested candidates are welcomed to apply online.
