Job Description

Our client is a newly setup medical company specializing in R&D and the sales and trading of medical consumables and supplies. Join them now and be a part of their ever-growing team.

Job Descriptions

- Formulate and execute monthly and annual production plans.
- Organize training for key production personnel on advanced technologies to enhance their technical competencies.
- Ensure product quality, issue production directives, implement balanced production plans, ensure schedule adherence, and complete order fulfillment tasks.
- Oversee identification, maintenance, repair, and decommissioning to ensure all production equipment and tooling remain in optimal working condition and meet production requirements.

- Ensure production processes are accurately guided and organize regular inspections to verify compliance with process discipline.

Job Requirements

- More than 5 years of experience in process engineering or production management within a manufacturing company.
- More than 5 years of production management experience in the medical device industry, with familiarity in relevant regulatory requirements.
- Strong learning capability and innovative mindset; excellent planning and execution abilities; possesses basic knowledge of lean manufacturing
- Familiar with the technical implementation, design and development controls, and regulatory requirements for Class II or Class III passive catheter products.
