Job Description

Join a high impact data analytics and platform team within a global technology organization spanning e-commerce, fintech, telecommunications, and media, reaching millions of users worldwide daily. You'll work with massive real world marketplace data, designing large scale data platforms, building advanced analytics and AI solutions, and negotiating challenges that directly impact customer and business growth, such as fraud detection. Your work will be central to decision making, transforming data into smarter strategies, better products, and tangible results that people around the world can experience.

Responsibilities:

- Design, develop, and maintain applications using ABAP language on SAP S/4 HANA.

- Collaborate with other developers, architects, and stakeholders to ensure project success.

- Participate in all phases of the software development lifecycle, including requirements gathering, design, development, testing, and deployment.

- Implement and maintain CI/CD pipelines for automated build, test, and deployment processes.

- Troubleshoot and resolve technical issues related to application performance, scalability, and security.

- Perform analysis of expensive ABAP programs.

- Stay updated on the latest trends and technologies in cloud computing and integration platforms.

- Contribute to the development of best practices and standards for application development and integration.

Required Skills

- Experience in SAP S/4HANA implementation projects.
- Over 3 years of experience in software development (SAP ABAP).
- Experience in detailed design using SAP.
- Experience in developing SAP Fiori screens.
- Excellent communication and collaboration skills.
- Strong problem-solving and analytical skills.

Desired Qualifications:

- SAP S/4HANA certification.

- Experience in ECC to S/4 HANA migration projects.

- Experience in implementing SAP BTP.
- Able to customize SAP FI/SD/MM modules independently.

- Hands on experience in analyzing expensive SQL statements.
