Job Description

About the company

We are currently looking for a Backend Software Engineer to work with a growing SaaS company who are developing a revolutionary vertical AI platform.

They have an extremely strong and growing reputation as a developer of cutting-edge AI-driven solution, with an ever-growing international team and corporate culture.

Having recently raised funds from the top VC's in both the Japan and the United States, their product development and market entry initiatives have been expediting at high paces. Due to the immediate business needs, we are seeking

candidates to start in the near term.

Who are you

· You will be an experienced Backend Engineer

· Someone who works attentively with cross-functional teams updated AI values to their products and services

· A designer that can build robust data structures and design API's and systems for requirements which are both functional and non-functional.

Why you should apply

This opportunity offers the ability to work in a multi-national startup that apply cutting-edge technology to a traditionally under-served industry. As a back-end engineer, you will be challenged to integrate AI models into the real world and having the satisfaction to see your work transform an essential, global industry.

Required Skills

Requirements

Here just list requirements

1. 5+ years in software development in fast paced tech heavy environments.
2. Must be proficient in the following languages/operations: TypeScript, Go, Rust
3. Japanese: JLPT N3 minimum (Enough to communicate internally)
4. Ability to optimize systems for AI speed performance.

Desired

1. 4+ Years in Backend Engineering role
