Job Description

The role focuses on managing daily data operations, including monitoring ETL processes, ensuring data quality, and handling database tasks using SQL and Python. It also supports ongoing data projects through documentation, system updates, and operational troubleshooting within a structured, primarily remote work environment.

Client Details

This organization is a medium-sized company in the financial services industry, known for its focus on leveraging technology to enhance operational efficiency. The company fosters a professional and innovative work environment, offering employees opportunities to contribute to impactful projects.

Description

- Manage daily data operations, including monitoring ETL processes, validating incoming data files, and resolving operational issues.
- Ensure data quality and consistency while performing tasks within a Data Warehouse platform, such as handling exceptions and maintaining master data.
- Support data-related projects through documentation, code review, and implementing updates using SQL and Python.
- Administer user access rights and collaborate across functions to maintain smooth data workflows and system

performance.

Job Offer

- Competitive Salary
- Opportunity to work in Tokyo, a global financial hub.
- Engagement with innovative projects in the financial services industry.
- Professional work environment with a focus on technology.
- Remote work mode available

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

- Brings strong foundational IT skills with hands-on experience in data operations, SQL, and routine database maintenance.
 - Demonstrates excellent problem-solving ability, attention to detail, and a proactive approach to managing daily data workflows.
 - Able to work both independently and collaboratively, contributing to documentation, troubleshooting, and process improvement.
 - Possesses business-level proficiency in both Japanese and English, ensuring smooth communication across tasks and stakeholders.
