Job Description

Company Overview: Our client is a mid-sized biopharmaceutical company focused on therapies for brain disorders. Their Global Patient Safety function oversees safety surveillance for clinical and marketed products across multiple regions. They seek a Safety Physician/Scientist on a fixed-term contract to support medical safety activities from case review to risk management.

Position: Safety Physician/Scientist — Global Medical Safety (Singapore, Contract)

Role summary: Provide medical-scientific leadership for safety surveillance of one or more products. Responsibilities include medical review of individual case safety reports (ICSRs), signal detection and assessment, benefit-risk evaluation, safety evidence generation, and authoring safety documents to support regulatory and risk-minimisation activities.

Key Responsibilities:

- Perform medical review and assessment of ICSRs, apply clinical judgement to seriousness, causality and case validity.
- Interpret safety data analyses and contribute to benefit-risk assessments.
- Prepare and contribute to safety deliverables (e.g., PBRER/PSUR input, RMP sections, signal reports) with appropriate scientific rationale.
- Lead or support signal detection, evaluation and risk-minimisation planning.
- Provide medical-scientific input to regulatory submissions and internal safety governance (e.g., Safety Committee).
- Collaborate with cross-functional teams (pharmacovigilance, clinical development, regulatory, epidemiology) to ensure consistent safety management.
- Maintain compliance with global PV regulations and Good Pharmacovigilance Practices (GVP).
- Support projects and process improvements in safety surveillance and reporting.

Reporting & Team:

- Based in Singapore within the Global Medical Safety team; works closely with regional and global safety physicians, safety leads and cross-functional stakeholders.
- Fixed-term / contract appointment (term length to be specified by employer).

Key Requirements:

- Medical degree (e.g., MD, MBBS, BDS) or equivalent clinical qualification.
- Clinical knowledge of disease states, comorbidities and treatments relevant to the therapeutic area.
- Experience in pharmacovigilance or drug safety within industry, including medical review of cases and familiarity with global PV regulations and GVP.
- Ability to interpret clinical and safety data and write clear scientific reports.
- Strong communication and teamwork skills; ability to engage cross-functional stakeholders.
- Project management capability and attention to regulatory timelines.

Preferred Background:

- Prior industry experience in pharmacovigilance, safety science or safety physician roles.
- Experience with safety databases and safety document authoring (PBRER/PSUR, RMP, signal management).
- Therapeutic knowledge relevant to neurology/psychiatry advantageous.

Performance Indicators:

- Quality and timeliness of medical review and regulatory submissions.
- Contribution to signal detection and risk-minimisation activities with demonstrable impact.
- Accuracy and clarity of safety reports and committee inputs.
- Effective collaboration with cross-functional teams and adherence to PV compliance standards.

What Will Make You Competitive:

- Demonstrated industry PV experience with strong clinical judgement and scientific writing skills.
- Track record in signal management, benefit-risk assessment and preparing regulatory safety documents.
- Effective project management and ability to operate independently within a global safety function.

Apply online or contact me for further information. Only shortlisted candidates will be notified due to application volume; thank you for your understanding.
